COMPANY OVERVIEW · NOVEMBER 2026

Team PJ

A software company from South Korea, started in 2026 by two founders who have been friends since elementary school.

Founded in South Korea, 2026

team-pj-lab.github.io

OUR GOAL

New possibilities, made real.

We turn new possibilities into reality with innovative technology, and create real value for the world.

WHO WE ARE

A software company, started by two friends.

FOUNDED

2026

BASED IN

South Korea

FOUNDERS

Two co-founders, friends since elementary school

LANGUAGES

We work in English and Korean

THE NAME

The P and J in PJ come from our family names: Park and Jung.

OUR APPROACH

Build it, test it for real, and publish the results together with their limits.

WHAT WE KNOW HOW TO BUILD

Eight areas, two founders.

AI Agent Systems

Agent design, tool execution, task planning and automation

Multi-Agent Orchestration

Task distribution, collaboration, conflict detection and coordination

Local AI & LLM

Local inference, model integration, privacy-first execution

Security Engineering

Execution permission control, integrity verification, monitoring

Infrastructure & Backend

Linux servers, Docker, APIs, system operation and integration

Automation & Developer Tools

Workflow automation, code verification, AI developer tools

Robotics & Embedded

Robot control, hardware integration, embedded programming

Application Engineering

Web and mobile applications and services

HOW WE WORK

Measured claims, short cycles.

ONE LAUNCH CYCLE, ABOUT A MONTH

1 WEEK	3 DAYS	2–3 WEEKS
Demand research	Build with AI agents	User feedback and fixes

Users decide

We don’t expand or shut down a product until real users have evaluated it and we have the data.

Every number, with its method

We publish the method, limits and data behind every number we state.

TEAM

Two founders.

Jung Woojin

CO-FOUNDER & CEO

DGIST

Runs the company and manages our servers.

Works out product ideas with Bugeon.

Builds rockets as vice-president of ARION, DGIST's rocket club.

Special Prize, Korea's National Science Exhibition (2025).

Park Bugeon

CO-FOUNDER & CTO

HIGH SCHOOL

Writes all of our code, owns architecture and security, and talks to users directly.

Part-time CTO of a 10-developer startup (2026).

Trained a 53M-parameter Korean language model from scratch.

Encouragement Award, 2nd Seongnam × KAIST AI Competition: 7th of 200 teams.

WHERE WE'RE GOING

Built in Korea, for developers everywhere.

STAGE	The earliest stage: two founders, building now.
MARKET	Global from day one, starting with the US. Products and documentation in English first.
BUSINESS	We start with software offered as SaaS, APIs and SDKs.
BASE	We plan to move to the US as funding and visas allow.

Let’s talk.

We’d be glad to tell you more about where we’re headed.
